EDUCATION

Manav Rachna International Institute of Research and Studies <i>B.Tech in Computer Science (Minor: Artificial Intelligence & Machine Learning)</i>	Faridabad, Haryana, India Aug 2024 – Present
St Giri Public School <i>Senior Secondary (XII), CBSE</i>	Delhi, India Mar 2023 – Mar 2024

ACHIEVEMENTS

Secured 1st position in an Ideathon by proposing a creative idea <i>Manav Rachna International Institute of Research and Studies</i>	Academic Year 2024–2025
--	-------------------------

EXPERIENCE

EXPERIENCE

Summer Analytics Program (AI & Data Science) <i>Consulting & Analytics Club, IIT Guwahati</i>	Jun 2025 – Jul 2025 <i>Remote</i>
* Selected participant in Summer Analytics 2025, a national-level data science program by IIT Guwahati * Worked on real-world analytics problems involving data preprocessing, feature engineering, and ML modeling * Developed a project on Dynamic Pricing for Urban Parking Lots using data-driven optimization techniques * Applied Python, Pandas, NumPy, and Scikit-learn to analyze datasets and build predictive models	

PROJECTS

Dynamic Pricing for Urban Parking Lots <i>Python, Pandas, NumPy, Data Analysis</i>	2025
• Developed a data-driven pricing strategy to optimize parking lot utilization based on demand patterns • Analyzed parking datasets using Python, Pandas and NumPy to identify peak usage trends and peak hours • Designed a dynamic pricing model that adjusts parking prices according to demand and availability • Performed exploratory data analysis (EDA) to derive insights for pricing optimization	
AI Resume Analyzer <i>Python, NLP, TF-IDF, Cosine Similarity</i>	2026
• Built an AI-powered resume analysis tool that evaluates resumes and provides improvement suggestions • Applied NLP techniques to extract key information such as skills, education, and experience • Implemented TF-IDF vectorization and cosine similarity to measure relevance between resumes and job descriptions • Developed an interactive interface using Streamlit to upload resumes and display analysis results	

RESEARCH WORK

X-FACT: Multilingual Explainable Fake News Detection with Metadata Integration	2026
• Co-authored a research paper proposing X-FACT, a multilingual fake news detection framework combining transformer-based semantic embeddings with metadata credibility signals • Designed a hybrid architecture integrating mBERT/XLM-R embeddings with publisher credibility and engagement metadata • Incorporated Explainable AI techniques (SHAP, LIME) to highlight influential textual and contextual features in classification • Manuscript submitted for academic review with a scheduled research presentation in July 2026	

TECHNICAL SKILLS

Programming Languages: Python, C, C++, SQL, HTML, CSS
Machine Learning & AI: Machine Learning Fundamentals, NumPy, Pandas
Natural Language Processing: NLP, TF-IDF, Cosine Similarity, Text Preprocessing
Data Analysis: Pandas, NumPy, Matplotlib
Tools & Platforms: Git, GitHub, VS Code, Linux Google Colab, Anaconda
